SUMMARY

Full-stack Software Developer, Founder, and Technology Leader with experience building scalable web applications, AI-powered systems, event management platforms, and business automation solutions. Led end-to-end development of client-facing products, managed real-world software projects, and founded SparkEdge Innovations to deliver custom technology solutions across multiple domains. Proven expertise in modern JavaScript ecosystems, system architecture, database design, and product development, complemented by leadership roles in technical communities and hackathons. Passionate about transforming innovative ideas into impactful, scalable products that solve real-world problems and drive business growth.

EDUCATION

Bharati Vidyapeeth Institute of Management and Research (BVIMR)
Bachelor of Computer Application (BCA) – Current Average GPA: 8.85/10.0

Delhi, India
July 2024 – June 2027

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, HTML/CSS, Python
Frameworks & Libraries: React.js, Node.js, Express.js, Next.js
Tools & Platforms: PostgreSQL, NoSQL, n8n, Google Cloud (Vertex AI, Gemini API), Git, Docker, RESTful APIs, CI/CD
Methodologies: Agile, Scrum, SDLC, Unit Testing, Debugging, Team Collaboration

EXPERIENCE

Founder
SparkEdge Innovations

Dec 2025 – Present
Delhi, India

- Established a technology startup delivering custom web, mobile, and AI-powered software solutions for 5+ clients across diverse industries
- Orchestrated end-to-end project execution across 5+ projects using agile methodologies, managing requirements, development, deployment, and client support

Tech Intern & Project Lead
Innowise (Client: Picklebugs – Co-founded by Virender Schwag)

July 2025 – Present
Delhi, India

- Engineered the complete Picklebugs platform, architecting customer-facing systems, admin portals, and database infrastructure following full SDLC across 5+ business verticals
- Implemented industry-specific systems for hospitality, residences, education, and sports courts with role-based access control and unit-tested modules
- Designed AI-powered workflows using n8n automation, owning full lifecycle from requirements to production deployment

Hackathon Mentor
Build-A-Thon

September 24, 2025
New Delhi, India

- Guided 100+ competing teams on system architecture, technical execution, and collaborative problem-solving under competitive time constraints

President & Founder
QuantaLoop Technical Society, BVIMR

2025 – Present
Delhi, India

- Initiated and lead QuantaLoop for 50+ members, establishing technical vision and organizing workshops, coding competitions, and team collaboration sessions

PROJECTS

Event Management, Attendance & Certificate Automation | *Next.js, React, TypeScript, Node.js*

- Live:* QRBlaze | CertiFrenzy
- Built a comprehensive event management platform enabling participant registration, QR-pass generation, automated email delivery, real-time check-ins, attendance tracking, coordinator management, and role-based access control
- Developed QRBlaze to streamline event operations through QR-based attendance management, volunteer workflows, event-wise tracking, and automated participant communication
- Built CertiFrenzy to automate certificate generation using customizable templates, participant feedback collection, coordinator certificate management, and QR-based authenticity verification

- Designed a seamless attendance-to-certification workflow, automatically transferring verified attendance data for certificate issuance, reducing manual effort and improving operational efficiency

UHI Care – Open Healthcare Platform | *React, Node.js, Supabase, WebRTC, AI Automation* | [GitHub](#)

- Constructed a healthcare platform with real-time video consultations via WebRTC, AI-powered scheduling, prescription generation, and automated notifications for 500+ users
- Architected scalable backend with structured data syncing, secure authentication, payment processing, and debugged RESTful APIs

MediBot – AI Wellness Assistant | *React, Node.js, Gemini API, NLP* | [GitHub](#)

- Constructed a conversational AI assistant using Google Gemini API delivering personalized health guidance, Ayurvedic remedies, fitness routines, appointment booking, and medication reminders

Slack AI Agent Builder | *n8n, OpenAI, Groq* | [GitHub](#)

- Built a multi-agent AI workflow generation platform that transforms conversational requirements into production-ready n8n automation blueprints
- Integrated Slack, OpenAI, and Groq LLMs to enable intelligent text and voice-based workflow design with contextual memory
- Automated requirement gathering, workflow validation, and instruction generation, significantly reducing manual automation planning effort

CERTIFICATIONS

Google Cloud: Build Real World AI Applications with Gemini and Imagen, Prompt Design in Vertex AI, Develop GenAI Apps with Gemini and Streamlit, Explore Generative AI with Vertex AI Gemini API, Inspect Rich Documents with Gemini, Multimodality and Multimodal RAG
