Summary

Full-stack developer and founder with hands-on experience building and deploying production web applications, cross-platform mobile apps, backend systems, and AI-powered automation solutions. Proficient in JavaScript, TypeScript, React.js, Next.js, React Native, Node.js, Express.js, Django, Tailwind CSS, PostgreSQL, Supabase, and RESTful APIs. Experienced in developing responsive user interfaces, secure role-based systems, mobile-first workflows, geolocation-based applications, API integrations, database-driven platforms, and automation solutions across healthcare, education, events, retail, and sales-management domains.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, Java, C#, SQL

Frontend Development: React.js, Next.js, TypeScript (TSX), HTML5, CSS3, Tailwind CSS, Responsive Web Design, UI/UX Fundamentals

Mobile Development: React Native, Expo, Cross-Platform Mobile Development, Mobile UI Development, Geolocation & Geofencing

Backend Development: Node.js, Express.js, Django, RESTful APIs, Authentication, Role-Based Access Control (RBAC)

Databases & Backend Services: PostgreSQL, Supabase, NoSQL, Database Design, Data Management

AI & Automation: n8n, Google Gemini API, OpenAI API, AI Chatbots, Workflow Automation, WhatsApp Business API Automation

APIs & Integrations: WhatsApp Business API, Shopify API, WebRTC, Supabase APIs, Third-Party API Integration

Developer Tools & Deployment: Git, GitHub, Docker, Postman, Vercel, Google Cloud, CI/CD

Education

Bharati Vidyapeeth Institute of Management and Research (BVIMR)

Jul 2024 – Jun 2027

Bachelor of Computer Application (BCA) – Current Average GPA: 8.75/10.0

Delhi, India

Experience

Founder

Dec 2025 – Present

SparkEdge Innovations

Delhi, India

- Built and shipped custom web, mobile, and AI-powered software solutions for 5+ clients across healthcare, education, and retail
- Led end-to-end execution across 5+ projects covering UI/UX, frontend development, backend APIs, databases, automation, deployment, and client support

Tech Intern & Project Lead

Jul 2025 – Dec 2025

Innowise (Client: Picklebugs – Co-founded by Virender Sehwal)

Delhi, India

- Engineered customer-facing interfaces, admin portals, backend workflows, and database infrastructure across 5+ business verticals
- Built role-based, unit-tested modules and AI-powered n8n workflows from requirements gathering through production deployment

Hackathon Mentor

Sep 2025

Build-A-Thon

New Delhi, India

- Guided 100+ competing teams on system architecture, UI/UX, technical execution, and problem-solving under competitive time constraints

President & Founder

2025 – Present

QuantaLoop Technical Society, BVIMR

Delhi, India

- Lead a 50+ member technical society through coding workshops, competitions, collaborative builds, and peer-learning initiatives

Founding Member & President

Feb 2025 – Present

Nexel Incubation Cell, BVIMR

Delhi, India

- Joined as a founding member in Feb 2025 and appointed President in Sep 2026; lead entrepreneurship, innovation, incubation, startup mentoring, and industry-focused initiatives

Projects

School Management Mobile Application React Native, Expo, TypeScript, Node.js, Express.js, PostgreSQL, Supabase

Live on Play Store (Early Access) – Prestige Junior School, 120+ active users

- Built a full-stack cross-platform mobile application with six role-based portals for administrators, principal, teachers, parents, staff, and security personnel
- Implemented QR-based student and staff attendance with real-time check-in/check-out, late-arrival tracking, and role-specific access
- Developed assignment, grading, fee-management, attendance, and academic-result workflows with responsive and user-focused mobile interfaces
- Integrated Supabase authentication with persistent sessions and role-protected Express REST APIs; added PDF fee-receipt generation with native mobile sharing

Success Arrow Tracker – Sales & Distribution Management Platform Sales Management, Inventory Management, Geofencing, Order Management, Invoicing

- Built an end-to-end sales-management platform for manufacturers and distributors to manage inventory, stock movement, retailer orders, sales executives, and distribution operations
- Developed separate inventory-management workflows for manufacturers and distributors, enabling visibility into available stock, incoming and outgoing inventory, and product movement across the distribution network
- Implemented geofenced location tracking for sales executives, allowing retailer orders to be placed only when the executive is physically within the configured geographical range of the respective retail outlet
- Built retailer order-taking workflows enabling field sales executives to capture products, quantities, and order details directly during shop visits
- Developed order and invoicing workflows to manage retailer transactions from order placement through invoice generation
- Designed role-based business workflows for manufacturers, distributors, sales executives, and retailer-facing operations with centralized visibility into inventory and sales activities

Event Management, Attendance & Certificate Automation Next.js, React, TypeScript, Node.js

Live: [QRBlaze](#) | [CertiFrenzy](#)

- Built QRBlaze for event registration, QR-pass generation, automated email delivery, attendance tracking, volunteer workflows, coordinator management, and participant communication
- Developed QR-based check-in workflows with role-based access for volunteers and coordinators to manage real-time participant attendance
- Built CertiFrenzy for customizable template-based certificate generation, participant data handling, and QR-based certificate authenticity verification
- Designed an attendance-to-certification workflow that automatically transfers verified attendance data for certificate issuance, reducing manual processing

UHI Care – Open Healthcare Platform React, Node.js, Supabase, WebRTC, AI Automation

[GitHub](#)

- Constructed a healthcare platform with real-time video consultations through WebRTC, AI-powered scheduling, prescription generation, and automated notifications for 500+ users
- Architected a scalable backend with structured data synchronization, secure authentication, payment processing, and RESTful API integrations

Slotic – WhatsApp Clinic Automation Platform n8n, WhatsApp Business API, Django, REST APIs, PostgreSQL

- Built an AI WhatsApp receptionist enabling patients to book, reschedule, and cancel doctor appointments through natural Hinglish-capable conversations with real-time slot availability and zero-double-booking logic
- Automated OPD token-queue management, booking confirmations, reminders, and appointment workflows through n8n
- Developed the Django REST backend powering doctor management, patient records, appointment data, and a staff dashboard with CSV/Excel export

Artbling – AI WhatsApp Sales Assistant for Jewelry Brand n8n, WhatsApp Business API, AI Chatbot, CRM Dashboard, Shopify API

- Built an AI WhatsApp sales agent handling product discovery, order-taking, customer queries, and conversational sales interactions
- Integrated Shopify APIs to automatically synchronize customer order status and related order information in real time
- Developed a companion CRM portal allowing the business owner to view customer conversations and launch marketing campaigns from a centralized dashboard

- Constructed a conversational AI assistant using Google Gemini API to deliver personalized health guidance, Ayurvedic remedies, fitness routines, appointment booking, and medication reminders

Achievements

- **Top 20 / 1,500+ Teams – HackArena @ IIIT Delhi:** Engineered and presented a competitive technology solution at a national-level hackathon
- **Top 25 / 300+ Teams – Hact @ Master's Union, Microsoft Hackathon:** Designed and developed UHI Care under competitive hackathon constraints
- **Top 40 / 1,500+ Teams – Microsoft Day Hackathon, Gurugram:** Demonstrated a live YOLOv8 computer-vision model for real-time object detection

Certifications

Google Cloud: Build Real World AI Applications with Gemini and Imagen · Prompt Design in Vertex AI · Develop GenAI Apps with Gemini and Streamlit · Explore Generative AI with Vertex AI Gemini API · Inspect Rich Documents with Gemini · Multimodality and Multimodal RAG
